

NATURAL SCIENCES

New Student Advising FALL 2024

Welcome to the Rice University Class of 2028!

This booklet is designed to give you an overview of the departments and undergraduate degree programs available in the Wiess School of Natural Sciences. We've included some general information, descriptions of each of our departments and programs, and degree summaries and sample degree plans for each Natural Sciences degree.

This booklet is intended as a supplement to, not a replacement for, other department advising materials. While we have double-checked all of the information in this booklet for accuracy, it is always possible that an error may still be included. **The information in the *General Announcements* is the final authority on degree requirements and academic regulations at Rice.**

RICE UNIVERSITY
Natural Sciences

CONTENTS

GENERAL ADVICE

- 4 Natural Sciences Overview
- 5 Divisional Advisors
- 6 AP Credit
- 6 Choosing a BA or BS Degree
- 7 Pre-Health Professions
- 7 Study Abroad
- 8 Endorsement in Science Engagement
- 9 Undergraduate Research

DEPARTMENTS & PROGRAMS

- 11 Introduction
- 12 Biosciences
- 26 Chemical Physics
- 29 Chemistry
- 36 Earth, Environmental and Planetary Sciences
- 44 Environmental Science
- 51 Kinesiology
- 57 Mathematics
- 64 Neuroscience
- 72 Physics and Astronomy

REFERENCE INFORMATION

- 85 Major Advisors

NATURAL SCIENCES OVERVIEW

The Wiess School of Natural Sciences advances fundamental understanding of the natural world and improves the human condition through pioneering research while empowering future generations of discoverers and leaders in a collaborative, diverse and inclusive community.

In support of that mission, faculty and students in the natural sciences seek answers to profound questions about the underlying structure of the universe and the origin and complexity of life, and they make discoveries that lay the foundations for tomorrow's technological marvels.

Natural Sciences faculty have a legacy of pathbreaking work in the sciences, such as the Nobel prize-winning discovery of carbon-60 by chemistry professors Robert Curl and Rick Smalley, which launched the field of nanoscience and established Rice as a world-renowned center for research in materials.

Discoveries made by natural sciences graduates have changed the way we view the universe and advanced the quality of life here on Earth: Robert Wilson '57 shared a Nobel prize for the discovery of the cosmic microwave background, Louis Brus '65 shared a Nobel prize for the discovery and synthesis of quantum dots, and work by Time Magazine's 2021 Hero of the Year Barney Graham '74 enabled the development of messenger-RNA-based COVID vaccines.

Faculty and students participate in many interdisciplinary institutes and centers that support collaborative work and provide additional resources for training and scientific inquiry, such as the the Rice Advanced Materials Institute, Rice Space Institute, Rice Sustainability Institute, Rice Synthetic Biology Institute and Rice Water Institute.

AP CREDIT

Many incoming Rice students have AP credit in biology, chemistry, math or physics. Each of these departments has provided information in the Departments and Programs section of this booklet to help students with AP credit select courses for your first semester at Rice. All students are encouraged to talk to your advisors and the course instructors to help with course selection. Pre-health students should also consult with the Office of Academic Advising's pre-health advisors to ensure that your course selection keeps you on track to fulfill medical or other health-professional school admission requirements.

CHOOSING A BA OR BS DEGREE

Most of our departments offer both a Bachelor of Arts (BA) degree and a Bachelor of Science (BS) degree. In general, a BA program contains more free elective hours than its BS counterpart. This makes it easier for you to pursue your other interests, a double major or a minor.

Both BA and BS degrees prepare students for a variety of career paths and for graduate and professional schools. If you are planning to go to graduate school or pursue a career in a scientific discipline, you should consider the BS degree, which provides greater depth of study in your major. If you are preparing for a career that is not primarily in a scientific discipline and want to pursue other areas of interest alongside your Natural Sciences major, the BA degree might be right for you.

The major requirements and a sample degree plan for both the BA and BS degrees are included in this booklet. Look through these to understand the different requirements and how they work with your planned course schedule.

PRE-HEALTH PROFESSIONS

Many incoming Rice students have an interest in medicine. There are many areas of study at Rice that will help you prepare for a career in the health professions, and strong preparation in natural sciences and mathematics is required for medical school study. Not every pre-med student at Rice is the same — your constellation of interests is likely different from other health-interested students, and you should enjoy and share in your diversity. Consult with your advising team to ensure that your degree plan includes all of the necessary courses, but take the time to explore the many majors with tools to address questions relating to human health and wellbeing to find the right fit for you.

The Office of Academic Advising offers specialized advising services for pre-med and other pre-health professions students. Join them for their Freshman Health Professions Advising Orientation to start preparing early for potential health profession tracks. Visit oaa.rice.edu for details.

STUDY ABROAD

If you are interested in studying abroad, international experiences are possible for Natural Sciences students in all majors. Early planning and consultation is very helpful for fitting an international experience into your degree plan, so we encourage interested students to reach out to department major advisors early to discuss your options.

There are many options available for interested students during the academic year and the summer, including research experiences that include international travel.

Rice's Study Abroad office (abroad.rice.edu) also provides information and support for students exploring the options for study abroad experiences.

ENDORSEMENT IN SCIENCE ENGAGEMENT

The Pathways to Discovery program in the School of Natural Sciences aims to give all Natural Sciences students the opportunity to develop the skills they need to become the scientific leaders and decision makers of tomorrow. Events and resources are designed to provide students with personalized academic advising, strengthen bonds between Natural Sciences students and faculty, engage undergraduate students in research across all disciplines, expose students to the full range of career opportunities accessible to Natural Sciences graduates, and connect students to the Houston community.

As part of the Pathways program, the School offers an Endorsement in Science Engagement, granted and administered by the Wiess School of Natural Sciences. The Endorsement is ideal for students interested in learning more about public science communication and outreach without a significant time commitment.

The Endorsement is available to students in any discipline and can be completed at any time during a student's education. In order to complete the Endorsement, students must attend a total of six events related to public science communication and/or science outreach and submit a brief analysis of each qualifying event.

Visit naturalsciences.rice.edu/endorsement-science-engagement for more information.

UNDERGRADUATE RESEARCH

Research is required for many of our BS degrees and is encouraged for all Natural Sciences students. There are many opportunities to conduct research with Rice faculty and with our partners in the Houston area, including at the Texas Medical Center. It is possible to find research opportunities early in your time at Rice, but it is typically recommended that first-year students take at least one semester to adjust to Rice before joining a research lab. Look through the Departments and Programs section of this booklet to find more advice on undergraduate research in each Natural Sciences discipline.

Natural Sciences Undergraduate Research Fair

Attend the Natural Sciences Undergraduate Research Fair on Friday, October 4, 2024 to learn more about the wide range of mentored undergraduate research experiences available on campus and off campus, including at the Texas Medical Center. This poster session and resource fair features current research opportunities in all Natural Sciences departments and programs.

Office of Undergraduate Research and Inquiry

In addition to our Natural Sciences faculty, Rice's Office of Undergraduate Research and Inquiry, or OURI, is another great resource for students who want to understand what research is before jumping in. Visit ouri.rice.edu/getting-started for useful resources for getting started in your exploration of research opportunities and to connect with their Peer Research Ambassadors, students who have engaged in research during their undergrad careers who want to help other students get involved.

OURI also offers UNIV 201 Research Readiness, a course open to all majors to learn about types of research and identify research positions that connect to your goals and interests. UNIV 201 is a pre-requisite for OURI's SER Scholars and SURF research programs. Learn more at ouri.rice.edu/univ-201

DEPARTMENTS AND PROGRAMS

In this section, you will find information about each of our departments and programs, including advice and tips to help you choose your major and design your degree plan. The School of Natural Sciences offers 19 majors and 7 minors within our departments and interdisciplinary programs. Here, we list the degree requirements for each major and minor.

The provided degree summaries for each of the degrees offered in the School of Natural Sciences are intended to help you compare majors and provide a starting point for designing your own course schedule.

There are many paths you can choose to complete each degree. Consult with your advising team to develop a personalized degree plan that takes into account your background and interests.

Sample Degree Plans

The sample degree plan is only one of many possible schedules.

- The sample degree plans in this booklet assume that you have no AP or transfer credit unless otherwise noted.
- You are assigned a semester in which to take a Freshman Writing Intensive Seminar (FWIS). In all degree plans, the FWIS is shown in the fall semester. If you are assigned to take a FWIS in the spring, swap the Distribution course listed for the spring semester with the FWIS listed for the fall semester.

The information in the *General Announcements* is the final authority on degree requirements and academic regulations at Rice.

BIOSCIENCES

Biosciences hosts a vibrant community engaged in research, teaching and scholarship across a wide range of life-science disciplines. To support the diverse biological interests of our students, the Biosciences major offers four distinct major concentrations: Biochemistry, Cell Biology and Genetics, Ecology and Evolutionary Biology, and Integrative Biology.

While each major concentration has a distinct focus area, all offer both BA and BS options. Both the BA and BS offer the same depth of content, allow for participation in undergraduate research and prepare students for a diversity of career paths. Although encouraged of all Biosciences students, research participation is required for the BS degree making the BS particularly well suited for students seeking entry into graduate school and careers in research. Biosciences undergraduates are enthusiastic about pursuing original research and avail themselves of the numerous research opportunities at Rice and in the Houston community.

Throughout their time at Rice, all Biosciences majors will gain the skills needed to evaluate the scientific literature; design experiments; and collect, analyze and communicate data. These transferrable skills will equip them for graduate, medical or other professional schools and a wide range of careers in the life sciences and beyond. Qualified students, interested in graduate school, have the option to apply to a specialized BA-MS-PhD program track at the end of their sophomore year.

For those in other majors and with a deep interest in the life sciences, Biosciences also offers two minors: Biochemistry and Cell Biology and Ecology and Evolutionary Biology. For example, students interested in computational biology may wish to pair one of these minors with a major in Computer Science or Computational and Applied Math. Students interested in medicine but majoring in the Humanities or Social Sciences may be interested in the Biochemistry and Cell Biology minor as it includes many of the life science core courses required for the health professions.

BIOSCIENCES

Degrees Offered

Biosciences	BA, BS
Biochemistry and Cell Biology	Minor
Ecology and Evolutionary Biology	Minor

Guidance on Becoming a Biosciences Major

- Join the Biosciences Opportunities Canvas site and mailing list; go to catalog.rice.edu to enroll. This is our main venue for up-to-date information about Biosciences advising and research opportunities.
- Those without AP biology credit should enroll in BIOS 201 and BIOS 202 in their first year as these courses are required for all Biosciences major concentrations and are prerequisites for virtually all other courses in the major.
- If you have AP credit and feel confident in your biology background, you can consider BIOS 300 (Paradigms in Biochemistry and Cell Biology), a 3-credit course designed for first year students with AP biology credit; BIOS 332 (Ecology); BIOS 334 (Evolution) or BIOS 340 (Integrative Animal Physiology) depending on your interests.
- First-year students wishing to take a lab course can enroll in the optional courses FWIS 115 (Exploring Biological Research) or NSCI 120 (Introduction to Scientific Research Challenges). These courses can satisfy the prerequisite for the independent research course BIOS 310.
- Research participation is encouraged for all students and required for the BS degrees. Visit biosugresearch.rice.edu and join the Biosciences Opportunities Canvas site for more information and postings to help you find and succeed in a lab at Rice, the Texas Medical Center and beyond

Biosciences BA - Requirements

CHEM 121 or CHEM 111	General Chemistry I or AP/OTH credit in General Chemistry I
CHEM 123 or CHEM 113	General Chemistry Laboratory I or AP/OTH credit in General Chemistry Lab I
MATH 101 or MATH 105	Single Variable Calculus I or AP/OTH credit in Calculus I
MATH 102 or MATH 106	Single Variable Calculus II or AP/OTH credit in Calculus II
PHYS 125*	General Physics (with lab)
STAT 305* or STAT 315/DSCI 301	Introduction to Statistics for Biosciences or Probability and Statistics for Data Science
BIOS 201	Introductory Biology I
BIOS 202	Introductory Biology II

Select 1 lecture course offered by the School of Natural Sciences or the School of Engineering at the 200-level or above

Students must complete coursework that satisfies the requirements of one major concentration.

Major Concentration in Biochemistry

CHEM 122 or CHEM 112	General Chemistry II or AP/OTH credit in General Chemistry II
CHEM 124 or CHEM 114	General Chemistry Laboratory II or AP/OTH credit in General Chemistry Lab II
CHEM 211 and CHEM 213	Organic Chemistry I and Organic Chemistry Discussion I
PHYS 126*	General Physics II (with Lab)
BIOS 301	Biochemistry I
BIOS 302	Biochemistry II
BIOS 352	Physical Chemistry for the Biosciences

Select 2 courses from the Elective Lecture Courses list for the Major Concentration in Biochemistry in the 2024 GA

BIOS 211	Intermediate Experimental Cellular and Molecular Biosciences
BIOS 311	Experimental Biochemistry

Select 2 courses from the Elective Laboratory Courses list for the Major Concentration in Biochemistry in the 2024 GA

Select 1 course from the Capstone Requirement list for the Major Concentration in Biochemistry in the 2024 GA

Biosciences BA

Major Concentration in Cell Biology and Genetics

CHEM 122 *or* CHEM 112 General Chemistry II *or* AP/OTH credit in General Chemistry II
CHEM 124 *or* CHEM 114 General Chemistry Laboratory II *or* AP/OTH credit in General
Chemistry Lab II
CHEM 211 *and* CHEM 213 Organic Chemistry I *and* Organic Chemistry Discussion I

BIOS 301 Biochemistry I

CHEMICAL PHYSICS

The Chemical Physics degree is jointly offered by the Department of Chemistry and the Department of Physics and Astronomy. It is designed for students with strong interests in both chemistry and physics. Students take upper-level courses in both chemistry and physics, focusing on the applications of physics to chemical systems. Schedule a meeting with the Major Advisors listed in this booklet if you are interested in learning more about this interdisciplinary major.

Degrees Offered

Chemical Physics BS

Guidance on Becoming a Chemical Physics Major

- Chemical Physics is an interdisciplinary field with upper-level course requirements in both Chemistry and Physics. To stay on-track to graduate in any of the three you need to complete the required introductory courses in chemistry, physics and mathematics during your first year.
- Talk to the PHYS 201 instructor about AP physics. It is usually better to take PHYS 111/112 rather than jumping straight into PHYS 201. If you are unsure what to do, consult the PHYS 201 instructor.
- Most freshmen will take a full-year course in general chemistry (CHEM 121/122/123/124). However, there are three options depending on your background. Students with credit for AP/IB Chemistry who plan to major in Chemical Physics are strongly advised to take CHEM 201 as preparation for upper-level courses. Another option is to go directly into organic chemistry (CHEM 211 or 219) during their freshman year. If you are unsure what to do, talk to a Chemistry advisor.
- Although research is not required for the degree, it is strongly recommended (and fun!) Opportunities are available in summer and during the school year, but it's not common to start during your first year at Rice.

CHEMICAL PHYSICS

Chemical Physics BS - Requirements

CHEM 121 *and* CHEM 123* General Chemistry I *and* General Chemistry Laboratory I

Select 1 from:

CHEM 122 *and* CHEM 124* General Chemistry II *and* General Chemistry Lab II
CHEM 201 Advanced Topics in General Chemistry

CHEM 211 *and* CHEM 213 Organic Chemistry I *and* Organic Chemistry Discussion I
or CHEM 219 *or* Organic Chemistry I Honors

CHEM 215 *or* CHEM 365 Organic Chemistry Lab
CHEM 301 Physical Chemistry I
CHEM 302 Physical Chemistry II

Select 1 from:

PHYS 101 *and* PHYS 103 Mechanics (with Lab) *and* Mechanics Discussion
PHYS 111 Honors Mechanics (with Lab)

Select 1 from:

PHYS 102 *and* PHYS 104 Electricity and Magnetism (with Lab) *and* Discussion
PHYS 112 Honors Electricity and Magnetism (with Lab)

PHYS 201 Waves, Light, and Heat
PHYS 202 Modern Physics
PHYS 231 Elementary Physics Lab
PHYS 301 Intermediate Mechanics
PHYS 302 Intermediate Electrodynamics

MATH 101 *or* MATH 105 Single Variable Calculus I *or* AP/OTH credit in Calculus I
MATH 102 *or* MATH 106 Single Variable Calculus II *or* AP/OTH credit in Calculus II
MATH 211 *or* MATH 220 Ordinary Differential Equations and Linear Algebra *or* Honors
or MATH 221 Ordinary Differential Equations *or* Honors Calculus III
MATH 212 *or* MATH 222 Multivariable Calculus *or* Honors Calculus IV *or* Honors
or MATH 232 Multivariable Calculus

Select 3 courses from:

PHYS 311 Introduction to Quantum Physics I
PHYS 312 *or* CHEM 430 Intro to Quantum Physics II *or* Quantum Chemistry
CHEM 360 Inorganic Chemistry
CHEM 415 Chemical Kinetics and Dynamics
CHEM 420 *or* PHYS 425 Classical and Statistical Thermodynamics
or Statistical and Thermal Physics

Select 2 courses from:

CHEM 366 Inorganic Chemistry Lab
CHEM 367 Materials Chemistry Lab
CHEM 368 Chemical Measurement Lab
CHEM 491 *or* PHYS 461 Research for Undergraduates
or Independent Research (up to 2 hours)
PHYS 332 Junior Physics Lab II

Select 2 courses from MATH or CMOR course offerings at the 300-level or above

*CHEM 111/112/113/114 may substitute for CHEM 121/122/123/124

CHEMISTRY

Undergraduate students interested in studying chemistry benefit from Rice's renowned faculty members and a strong research program. The Department of Chemistry offers undergraduate chemistry majors a Bachelor of Science (BS) degree or a Bachelor of Arts (BA) degree.

The BS degree rigorously prepares students for a career in chemistry or a related discipline, and the degree requirements are consistent with the guidelines for certification by the American Chemical Society. This curriculum provides a broad and comprehensive introduction to core areas of chemistry while promoting depth of understanding in one or more specific fields. BS students complete a series of foundation courses in general chemistry, analytical chemistry, biological chemistry, inorganic chemistry, organic chemistry and physical chemistry. Students then complete one or more specializations, or "tracks," consisting of in-depth courses both in and out of the specialization.

The BA degree is a more flexible program that provides a comprehensive overview of all areas of chemistry, including laboratory experiences, but can be coupled more easily with other majors or professional career paths.

For more in-depth information about Chemistry academic programs, please see our Undergraduate Advising Booklet: <https://chemistry.rice.edu/undergraduate-program-overview>

Degrees Offered

Chemistry

BA, BS

CHEMISTRY

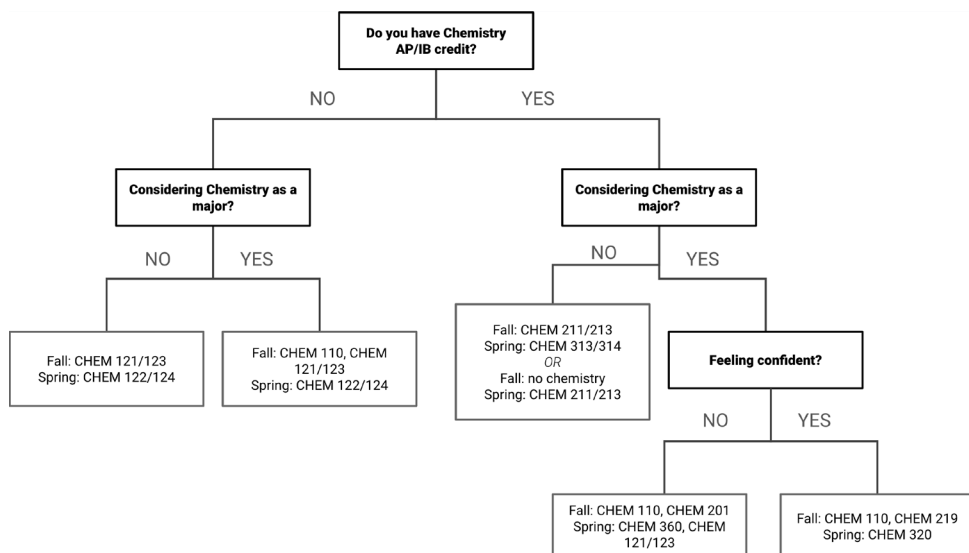

Guidance on Becoming a Chemistry Major

- The Department of Chemistry offers several pathways for completing the core curriculum required for chemistry majors as well as for the many students who need these courses for other majors and pre-med requirements. These paths are summarized in the flowchart below.

Students without AP/IB or equivalent credit have the simplest decision-making process: enroll in CHEM 121/123 in the Fall semester.

Students considering a chemistry major should add to this CHEM 110 — a one credit hour seminar that introduces students to research opportunities in the department of chemistry.

Students entering with AP credit or other equivalent preparation have additional flexibility in course selection as described below.

Chemistry BA - Requirements

CHEM 121 and CHEM 123* General Chemistry I and General Chemistry Laboratory I
 CHEM 122 and CHEM 124* General Chemistry II and General Chemistry Laboratory II

Select 1 from:

CHEM 211 and CHEM 213 Organic Chemistry I and Discussion I
 CHEM 219 Organic Chemistry I Honors

Select 1 from:

CHEM 313 and CHEM 314 Organic Chemistry II and Discussion II
 CHEM 320 Organic Chemistry II Honors

CHEM 330 Analytical Chemistry

CHEM 360 Inorganic Chemistry

BIOS 301* Biochemistry I

Select 2 from:

BIOS 352 Physical Chemistry for the Biosciences
 CHEM 301 Physical Chemistry I
 CHEM 302 Physical Chemistry II

MATH 101 or MATH 105 Single Variable Calculus I or AP/OTH credit in Calculus I
 MATH 102 or MATH 106 Single Variable Calculus II or AP/OTH credit in Calculus II
 MATH 211* Ordinary Differential Equations and Linear Algebra

Select 1 from:

PHYS 101 and PHYS 103 Mechanics (with lab) and Mechanics Discussion
 PHYS 111 Honors Mechanics (with Lab)
 PHYS 125 General Physics (with Lab)

Select 1 from:

PHYS 102 and PHYS 104 Electricity and Magnetism (with Lab) and
 Electricity and Magnetism Discussion
 PHYS 112 Honors Electricity and Magnetism (with Lab)
 PHYS 126 General Physics II (with Lab)

Select 3 from:

BIOS 311* Experimental Biochemistry
 CHEM 365 Organic Chemistry Lab
 CHEM 366 Inorganic Chemistry Lab
 CHEM 367 Materials Chemistry Lab
 CHEM 368 Chemical Measurement Lab

Select 2 from:

BIOS 302 Biochemistry II
 CHEM 313 and CHEM 314 Organic Chemistry II and Discussion II
 or CHEM 320 or Organic Chemistry II Honors
 Any lecture course between CHEM 400 and CHEM 489
 Any lecture course between CHEM 495 and CHEM 699

* CHEM 111/112/113/114 may substitute for CHEM 121/122/123/124

MATH 220 may substitute for MATH 211

Chemistry students may enroll in BIOS 301 without the prerequisite BIOS 201. Students should contact the course instructor for more information

BIOS 311 has prerequisites of BIOS 211 and BIOS 301

Chemistry BA

* CHEM 111/112/113/114 may substitute for CHEM 121/122/123/124

MATH 220 may substitute for MATH 211

Chemistry students may enroll in BIOS 301 without the prerequisite BIOS 201. Students should contact the course instructor for more information

BIOS 311 has prerequisites of BIOS 211 and BIOS 301

Chemistry BS - Requirements

Students must complete advanced work that satisfies the requirements of one area of specialization.

Area of Specialization: Biological and Medicinal Chemistry

BIOS 302 Biochemistry II

Select 2 courses from:

Any lecture course between CHEM 400 and CHEM 489

Any lecture course between CHEM 495 and CHEM 699

Area of Specialization: Inorganic Chemistry and Inorganic Materials

CHEM 475 Physical Methods in Inorganic Chemistry

CHEM 495 Transition Metal Chemistry

or CHEM 496 or Advanced Inorganic Chemistry

Select 1 course from:

Any lecture course between CHEM 400 and CHEM 489

Any lecture course between CHEM 495 and CHEM 699

Area of Specialization: Organic Chemistry

CHEM 401 Advanced Organic Chemistry

Select 2 courses from:

BIOS 302 Biochemistry II

Any lecture course between CHEM 400 and CHEM 489

Any lecture course between CHEM 495 and CHEM 699

Area of Specialization: Physical and Theoretical Chemistry

CHEM 420 Classical and Statistical Thermodynamics

CHEM 430 Quantum Chemistry

Select 1 course from:

CHEM 415 Chemical Kinetics and Dynamics

CHEM 531 Advanced Quantum Chemistry

CHEM 559 Spectroscopy at the Single Molecule/Particle Limit

Though not required, ***MATH 211 is strongly recommended*** for students planning to specialize in Physical and Theoretical Chemistry or planning to pursue graduate studies.

NOTE: While the above sample degree plan suggests 19 credit hours of independent research, the BS degree requires at least eight credit hours.

*CHEM 110 is recommended (not required) of all BS majors prior to enrolling in CHEM 391

There is a lot of flexibility in the completion of advanced coursework. However, not all courses are taught every year — consult with your major advisor about your course plan.

EARTH, ENVIRONMENTAL AND PLANETARY SCIENCES

Earth, Environmental and Planetary Sciences (EEPS) majors bring together the fields of data science, mathematics, physics, chemistry and biology to learn how every part of the Earth — from the core to the crust, atmosphere, oceans and life — interacts in time and space to build the habitable planet on which we live. We use our understanding of complex natural systems to investigate how mountains form, how volcanoes and earthquakes develop, how our natural resources form (energy, water, soils and minerals), and how climate and the environment evolve through time.

Using methodologies that range from laboratory, theory, data science and computer modeling to field work, the skills Earth scientists gain make them uniquely poised to advise on some of the most pressing problems of environment and energy facing society today.

The BS major offers three areas of specialization: Geoscience, Environmental Earth Science and Planetary Science. Compared to the BS degree, the BA degree provides greater flexibility of course choices.

Degrees Offered

Earth, Environmental and Planetary Sciences BA, BS, Minor

Guidance on Becoming an EEPS Major

- Any of our 3-credit, 100-level courses fulfill the requirement of an introductory course. Take any course that interests you to check out a possible EEPS major.
- EEPS 114 (Discoveries in EEPS Seminar) is a great introduction to the different areas of Earth, Environmental and Planetary Sciences and helpful for determining an Area of Specialization.
- Consider working with a research group, and check out the EXPLORE program. Becoming involved in research is a great way to get credit or paid while learning more about your interests. Most EEPS majors participate in undergraduate research, either through the course EEPS 481 (Undergraduate Research) or through summer research internships.
- If you have AP math credit, consider taking more advanced MATH classes during your first year to start preparing for intermediate and upper-level classes and fulfill graduation requirements.

Earth, Environmental and Planetary Sciences BA - Requirements

MATH 101 *or* MATH 105 Single Variable Calculus I *or* AP/OTH credit in Calculus I
 MATH 102 *or* MATH 106 Single Variable Calculus II *or* AP/OTH credit in Calculus II

CHEM 121 or CHEM 111	General Chemistry I or AP/OTH credit in Gen Chem I
CHEM 123 or CHEM 113	General Chemistry Lab I or AP/OTH credit in Gen Chem Lab I
CHEM 122 or CHEM 112	General Chemistry II or AP/OTH credit in Gen Chem II
CHEM 124 or CHEM 114	General Chemistry Lab II or AP/OTH credit in Gen Chem Lab II

Select 1 from:

PHYS 101 and PHYS 103	Mechanics (with Lab) and Mechanics Discussion
PHYS 111	Honors Mechanics (with Lab)
PHYS 141	Concepts in Physics I

Select 1 from:

PHYS 102 and PHYS 104	Electricity & Magnetism (with Lab) and E&M Discussion
PHYS 112	Honors Electricity and Magnetism (with Lab)
PHYS 142	Concepts in Physics II

Select course 1 from:

EEPS 101	The Earth
EEPS 106	Investigating Earth's Surface
EEPS 107/ENST 201	Climate Change and Extreme Weather
EEPS 108	Natural Disasters
EEPS 109	Oceanography
EEPS 110	The Earth System, Environment and Society
EEPS 111	Inhabiting Planet Earth
EEPS 115	The Planets
EEPS 116	The Earth and the Solar System

Select 1 course from:

EEPS 220 or CMOR 220	Introduction to Computation in EEPS or Introduction to Engineering Computation
-------------------------	---

Select 4 courses from:

EEPS 321	Earth and Planetary Surface Environments
EEPS 322	Earth and Planetary Chemistry and Materials
EEPS 323	Earth and Planetary Structure and Dynamics
EEPS 324	Earth's Interior
EEPS 325	Oceans, Atmospheres and Climate

EEPS 334	The Earth Laboratory
----------	----------------------

Students must complete one of the following areas of specialization:

Earth, Environmental and Planetary Sciences BS - Requirements

Area of Specialization: Environmental Earth Science

Select at least 1 course from each of the following 5 fields (see 2024 GA for course lists):

Breadth in Environmental Science
 Climate, Atmosphere, and Water
 Environmental Geochemistry and Geophysics
 Modeling and Data Analysis
 Surface Processes

Select a minimum of 2 courses from:

Any course from EEPS course offerings between course numbers EEPS 407: 480,
 EEPS 482: 490, EEPS 492: 499

BIOS 201	Introductory Biology I
BIOS 202	Introductory Biology II
CHEM 211 and CHEM 213	Organic Chemistry I and Discussion I
EEPS 390 or EEPS 391	Geology Field Camp or Practical Experience in EEPS
MATH 212 or MATH 232	Multivariable Calculus or Honors Multivariable Calculus
PHYS 201	Waves, Light, and Heat
STAT 280 or STAT 180	Elementary Applied Statistics or AP/OTH Credit in Statistics

Any course at the 300-level or above from the following subject codes:
 BIOS, CEVE, CHEM, CMOR, ENVS, MATH, MECH, PHYS, or STAT

Area of Specialization: Geoscience

Select at least 1 course from each of the following fields (see 2024 GA for course lists):

Deformation and Dynamics
 Geophysics
 Modeling and Data Analysis
 Petrology, Geochemistry, and Materials Characterization
 Surface Processes

Select a minimum of 2 courses from:

Any course from EEPS course offerings between course numbers EEPS 407: 480,
 EEPS 482: 490, EEPS 492: 499

BIOS 201	Introductory Biology I
BIOS 202	Introductory Biology II
BIOS 211	Intermediate Expt'l Cellular and Molecular Biosciences
CHEM 211 and CHEM 213	Organic Chemistry I and Discussion
EEPS 390 or EEPS 391	Geology Field Camp or Practical Experience in EEPS
MATH 212 or MATH 232	Multivariable Calculus or Honors Multivariable Calculus
PHYS 201	Waves, Light, and Heat
STAT 280 or STAT 180	Elementary Applied Statistics or AP/OTH Credit in Statistics

Any course at the 300-level or above from the following subject codes:
 BIOS, CEVE, CHEM, CMOR, ENVS, MATH, MECH, PHYS, or STAT

Earth, Environmental and Planetary Sciences BS - Requirements

Area of Specialization: Planetary Science

Select at least 1 course from each of the following fields (see 2024 GA for course lists):

Breadth in Planetary Sciences
Deformation and Dynamics
Modeling and Data Analysis
Petrology, Geochemistry, and Materials Characterization
Surface Processes

Select a minimum of 2 courses from:

Any course from EEPS course offerings between course numbers EEPS 407: 480,
EEPS 482: 490, EEPS 492: 499
EEPS 390 or EEPS 391 Geology Field Camp or Practical Experience in EEPS
MATH 212 or MATH 232 Multivariable Calculus or Honors Multivariable Calculus
PHYS 201 Waves, Light, and Heat
PHYS 231 Elementary Physics Lab
STAT 280 or STAT 180 Elementary Applied Statistics or AP/OTH Credit in Statistics
Any course at the 300-level or above from the following subject codes:
ASTR, CHEM, CMOR, MATH, MECH, PHYS, or STAT

ENVIRONMENTAL SCIENCE

The Environmental Science degree is jointly offered by the Department of Biosciences and the Department of Earth, Environmental and Planetary Sciences. It is designed to help students understand environmental issues from a scientific perspective and be able to solve issues using a variety of interdisciplinary perspectives.

The interdisciplinary Environmental Science BA and BS degree paths explore interconnections between humans and the natural environment, drawing courses from Biosciences; Earth, Environmental and Planetary Sciences; Civil and Environmental Engineering; and across Humanities, Architecture and Social Sciences. This program is designed to foster the critical thinking required to address the increasing complexities facing our planet.

Degrees Offered

Environmental Science BA, BS

Guidance on Becoming an Environmental Science Major

- The Environmental Science major addresses environmental issues in the context of what we know about Earth sciences, biology and society. Students declare a concentration in either ecology and evolutionary biology or Earth, environmental and planetary sciences. Upper-level major courses reflect students' chosen concentrations and include an affiliation with the relevant department (Biosciences or Earth, Environmental and Planetary Sciences). The major includes strong connections to the Humanities and Social Sciences.

ENVIRONMENTAL SCIENCE

Environmental Science BA - Requirements

BIOS 201	Introductory Biology I
BIOS 202	Introductory Biology II
BIOS 332	Ecology
CHEM 121 or CHEM 111	General Chemistry I or AP/OTH credit in Gen Chem I
CHEM 123 or CHEM 113	General Chemistry Lab I or AP/OTH credit in Gen Chem Lab I
CHEM 122 or CHEM 112	General Chemistry II or AP/OTH credit in Gen Chem II
CHEM 124 or CHEM 114	General Chemistry Lab II or AP/OTH credit in Gen Chem Lab II
MATH 101 or MATH 105	Single Variable Calculus I or AP/OTH credit in Calculus I
MATH 102 or MATH 106	Single Variable Calculus II or AP/OTH credit in Calculus II
STAT 280 or STAT 305	Elementary Applied Statistics or Introduction to Statistics for Biosciences
BIOS 213	Introductory Lab in Ecology and Evolution
ENST 100/ARCH 105	Environment, Culture and Society
Any 3 credit EEPS course offering at the 100-level	
EEPS 321	Earth and Planetary Surface Environments
EEPS 325	Oceans, Atmospheres and Climate

Select 1-2 courses (2-3 credit hours) from the Field Experience list in the 2024 GA

Select 1 Social Sciences Advanced Elective from the list in the 2024 GA

Select 1 Humanities and Architecture Advanced Elective from the list in the 2024 GA

Select 1 Natural Sciences and Engineering Advanced Elective from the list in the 2024 GA

BIOS 495/EEPS 495	Seminar: Topics in Environmental Science
-------------------	--

Students must complete the requirements for one major concentration.

Major Concentration: Earth Science

Select 2 courses from:

EEPS 220	Intro to Computation in EEPS
EEPS 322	Earth and Planetary Chemistry and Materials
EEPS 323	Earth and Planetary Structure and Dynamics
EEPS 340	Global Biogeochemical Cycles

Select 1 course from the Elective Requirement list for the Major Concentration in Earth Science in the 2024 GA

Environmental Science BA - Requirements

Major Concentration: Ecology and Evolutionary Biology

Select 2 courses from:

BIOS 271	Environmental Management
BIOS 374	Global Change Biology
BIOS 423	Conservation Biology

Select at least 1 course from:

BIOS 321	Animal Behavior
BIOS 326	Insect Biology
BIOS 334	Evolution
BIOS 336	Plant Diversity
BIOS 338	Analysis and Visualization of Biological Data
BIOS 423	Conservation Biology
BIOS 431	Emerging Infectious Diseases
EEPS 340	Global Biogeochemical Cycles

** Courses previously used to meet Core Requirements cannot be counted a second time as an elective*

KINESIOLOGY

The Kinesiology Department is home to two academic majors: Health Sciences and Sports Medicine and Exercise Physiology. Flexible curricula permit undergraduate majors to tailor their coursework to their particular postgraduate needs and also permit them to study abroad, pursue internships and conduct undergraduate research. With a median class size of 19, students find an active, close-knit community of scholars, teachers and mentors who take a personal interest in every student major. The Kinesiology programs have one of the largest number of academic majors in the School of Natural Sciences and are among the largest choice of student majors at Rice.

The Health Sciences major provides students with a fundamental background in health promotion and disease prevention. Viewing health from the broader community level, students acquire the knowledge and skills for careers in public health related positions.

The Sports Medicine and Exercise Physiology major provides a strong basic science foundation and then interfaces this foundation with application to the human body. It is the only academic specialization on campus that provides detailed instruction in human anatomy and human physiology in addition to nutrition, biomechanics, motor learning and exercise physiology among other topics.

Degrees Offered

Health Sciences	BA
Sports Medicine and Exercise Physiology	BA

KINESIOLOGY

Guidance on Becoming a Kinesiology Major

- Pre-health professions students choosing to major in either Health Sciences or Sports Medicine and Exercise Physiology should consult with one of the department advisors for your major as well as the Health Professions Advising service to ensure that you are choosing the correct pre-requisites as you are planning your degree.
- Be mindful when degree planning of courses that may only be offered once per academic year.
- New majors or those interested in the field are encouraged to enroll in KINE 120 (Scientific Foundations of Kinesiology) if interested in Sports Medicine and Exercise Physiology or HEAL 222 (Principles of Public and Community Health) or HEAL 119 (Introduction to Health and Wellness) if interested in Health Sciences prior to upper-level courses to gain an understanding of the majors. HEAL 132 (Medical Terminology) is recommended prior to KINE 300 (Human Anatomy) or KINE 301 (Human Physiology.)
- Qualified students are encouraged to participate in independent research. This independent research allows integral involvement in basic or applied research directed by a faculty advisor. Opportunities are available with a variety of institutions in the Texas Medical Center as well as within the department.
- Students are encouraged to pursue any of a variety of highly competitive internships, which provide practical experience tailored to your interests. The close proximity of Rice to the Texas Medical Center allows you to find experience in a research or medical setting for potentially every aspect of health or medicine. Additionally, the newly constructed Houston Methodist-Rice University Center for Human Performance is located in Tudor Fieldhouse and offers internships for undergraduates.

Health Sciences BA - Core Requirements

HEAL 222	Principles of Public and Community Health
HEAL 313	Foundations of Health Promotion and Education
HEAL 407	Epidemiology
HEAL 422	Theories and Models of Health Behavior
HEAL 460	Planning and Evaluation of Health Promotion and Education
KINE 319	Statistics for the Health Professional

MATHEMATICS

Mathematics is not just about numbers; it is the study of structures and patterns that, while abstract, provide a language and a toolkit for interpreting our world. The Mathematics Department offers courses in the traditional areas of pure mathematics: analysis, algebra, geometry and topology, as well as classes in such areas as combinatorics, dynamical systems and probability. Undergraduates seeking a math degree receive training in problem solving, analytical thinking, and the logical and precise communication of their ideas. It is precisely these skills that make math majors a valuable commodity everywhere, from industry to law to finance, plus many academic fields beyond math.

The BS program prepares students for PhD programs in mathematics and related disciplines. It requires courses from each of the subfields of mathematics.

The BA program is quite flexible and is even more flexible for students pursuing another major with math — a popular choice! Today's budding scientist, engineer, computer scientist, economist or social scientist needs much more mathematical training than did previous generations. The ease and flexibility of the double major in math allow students to get degree credit for their work.

Degrees Offered

Mathematics

BA, BS, Minor

MATHEMATICS

Guidance on Becoming a Mathematics Major

- The Math Department website provides detailed information about choosing the proper math course for your first semester at Rice. See <https://math.rice.edu/which-courses-should-i-take> for advice on class selection for first-year students.
- If you know single-variable calculus, have a strong math background and are interested in a major with a substantial math component, consider taking an honors track such as (1) Honors Linear Algebra (MATH 354) followed by Honors Multivariable Calculus (MATH 232); or (2) Honors Calculus III and IV (MATH 221-222). These get more into theoretical aspects of math and also emphasize writing clear and precise mathematical arguments. Track (2) is more advanced than Track (1) and is intended for students who are particularly confident both in their math background and in their interest in studying pure mathematics. Consult a Math advisor to determine which track might be appropriate for you.
- You should also consider Research Experiences for Undergraduates and other summer research programs if you are thinking of applying to graduate school in Math. (see: www.ams.org/programs/students/emp-reu for more information)
- Not required but highly-recommended courses:
 - MATH 232 – Honors Multivariable Calculus
 - MATH 290 – Mathematical Writing Seminar
 - MATH 354 – Honors Linear Algebra
 - MATH 221/222 – Honors Calculus III/IV
 - MATH 321 – Introduction to Analysis I
 - MATH 356 – Abstract Algebra I

Mathematics BA - Requirements

MATH 101 *or* MATH 105 Single Variable Calculus I *or* AP/OTH credit in Calculus I
 MATH 102 *or* MATH 106 Single Variable Calculus II *or* AP/OTH credit in Calculus II

(Note: If you already know calculus, you may substitute a higher MATH course for MATH 101 or 102.)

Select 1 from:

MATH 211 <i>and</i> MATH 212	Ordinary Differential Equations and Linear Algebra <i>and</i> Multivariable Calculus
MATH 211 <i>and</i> MATH 222	Ordinary Differential Equations and Linear Algebra <i>and</i> Honors Calculus IV
MATH 211 <i>and</i> MATH 232	Ordinary Differential Equations and Linear Algebra <i>and</i> Honors Multivariable Calculus
MATH 220 <i>and</i> MATH 212	Honors Ordinary Differential Equations <i>and</i> Multivariable Calculus
MATH 220 <i>and</i> MATH 222	Honors Ordinary Differential Equations <i>and</i> Honors Calculus IV
MATH 220 <i>and</i> MATH 232	Honors Ordinary Differential Equations <i>and</i> Honors Multivariable Calculus
MATH 354 <i>and</i> MATH 232	Honors Linear Algebra <i>and</i> Honors Multivariable Calculus
MATH 221 <i>and</i> MATH 222	Honors Calculus III <i>and</i> Honors Calculus IV

(Note: MATH 355 or MATH 354 can substitute for MATH 211 or MATH 220 in any of the above.)

Select 8 courses from MATH course offerings at the 300-level or above

Mathematics BS - Requirements

MATH 101 or MATH 105 Single Variable Calculus I or AP/OTH credit in Calculus I
 MATH 102 or MATH 106 Single Variable Calculus II or AP/OTH credit in Calculus II

Select 1 course from:

MATH 211 Ordinary Differential Equations and Linear Algebra
 MATH 220 Honors Ordinary Differential Equations
 MATH 381 Introduction to Partial Differential Equations
 MATH 423/CMOR 405 Partial Differential Equations I

Select 1 from:

MATH 212 Multivariable Calculus
 MATH 221 and MATH 222 Honors Calculus III and Honors Calculus IV
 MATH 232 Honors Multivariable Calculus
 MATH 322 Introduction to Analysis II
 MATH 370 Calculus on Manifolds

Select 1 course from:

MATH 221 Honors Calculus III
 MATH 354 Honors Linear Algebra
 MATH 355 Linear Algebra

Select 2 courses from:

MATH 321 Introduction to Analysis I
 MATH 322 Introduction to Analysis II
 MATH 331 Honors Analysis
 MATH 425 Integration Theory

Select 2 courses from:

MATH 356 Abstract Algebra I
 MATH 357 Abstract Algebra II
 MATH 463 Advanced Algebra I

Select 1 course from:

MATH 370 Calculus on Manifolds
 MATH 401 Differential Geometry of Curves and Surfaces
 MATH 402 Differential Geometry
 MATH 451 Differentiable Manifolds
 MATH 452 Riemannian Geometry

MATH 382 or MATH 427 Computational Complex Analysis or Complex Analysis

Select 1 course from:

MATH 443 General Topology
 MATH 444 Geometric Topology
 MATH 445 Algebraic Topology

Students must complete a minimum of 33 credit hours from MATH course offerings at the 300-level or above

Mathematics BS

MATH 355	Linear Algebra

Select 3 additional courses from MATH course offerings

NEUROSCIENCE

Both the Neuroscience BA and BS degrees are interdisciplinary programs designed to provide multiple paths for students interested in the brain and how it works. The BA degree provides a general overview of all facets of neuroscience, while the BS degree has two tracks that allow students to specialize in either Molecular and Cellular Neuroscience or Computational Neuroscience. Regardless of the degree path, students will explore the biological basis of cognition, how information is processed by neurons and neural systems and how the latest mathematical and scientific tools can be utilized to learn more about ourselves. Research experiences are highly encouraged with professors at Rice and across the street in the Texas Medical Center.

For those who are interested in neuroscience but do not wish to major in the field, there is an associated minor with two tracks to choose from: Humanities and Social Sciences and Natural Sciences and Engineering. Each track involves taking a selection of core and elective courses selected from the above majors and allows for research to count for credit towards the minor.

Degrees Offered

Neuroscience	BA, BS, Minor
--------------	---------------

Guidance on Becoming a Neuroscience Major

- Our website (www.neuroscience.rice.edu) contains degree requirements, possible pathways for the degrees, lists and contact information of the major/minor advisors, links to student organizations and suggestions on how to get into research.
- NEUR 310 gives credit for Independent Research. The course can be taken twice for both the major and minor (talk with an advisor on how this is done). However, students can, and often do, repeat the course for additional general elective credit and to gain real world lab experience. It is fine to do research in different labs, but we suggest that you stick with a lab for multiple semesters to accomplish projects and potentially publish scientific journal articles.
- Programming is an important skill in any modern science. For the major, CMOR 220 or COMP 140 are required and act as an introduction to coding for many students. We suggest taking this early in your undergraduate career so that you have longer to use the skills you develop in the course (e.g., doing data analysis while working in a lab for NEUR 310).

Neuroscience BA - Requirements

BIOS 201	Introductory Biology I
CMOR 220 <i>or</i> COMP 140	Intro. to Engr. Computation <i>or</i> Computational Thinking
CHEM 121 <i>and</i> CHEM 123 <i>or</i> CHEM 111 <i>and</i> CHEM 113	General Chemistry I <i>and</i> General Chemistry Lab I <i>or</i> AP/OTH Credit in General Chemistry I <i>and</i> Lab
CHEM 122 <i>and</i> CHEM 124 <i>or</i> CHEM 112 <i>and</i> CHEM 114	General Chemistry II <i>and</i> General Chemistry Lab II <i>or</i> AP/OTH Credit in General Chemistry II <i>and</i> Lab
MATH 101 <i>or</i> MATH 105*	Single Variable Calculus I <i>or</i> AP/OTH credit in Calculus I
MATH 102 <i>or</i> MATH 106	Single Variable Calculus II <i>or</i> AP/OTH credit in Calculus II
PHYS 125*	General Physics (with Lab)
PHYS 126*	General Physics II (with Lab)
PSYC 203	Introduction to Cognitive Psychology

Select 1 course from:

STAT 305	Introduction to Statistics for Biosciences
STAT 310/ECON 307	Probability and Statistics
STAT 315/DSCI 301	Probability and Statistics for Data Science

BIOS 385	Cellular and Molecular Mechanisms of the Neuron
NEUR 362/PSYC 362	Cognitive Neuroscience: Exploring the Living Brain
NEUR 380/PSYC 380	Fundamental Neuroscience Systems
NEUR 383/BIOE 380/ELEC 380	Introduction to Neuroengineering: Measuring and Manipulating Neural Activity
BIOS 212	Intermediate Experimental Cellular and Molecular Neuroscience

Select a minimum of 2 courses (minimum of 2 credit hours) from:

BIOS 315	Experimental Physiology
BIOS 417	Experimental Cell and Molecular Neuroscience
NEUR 310*	Indep. Research for Neuroscience Undergraduates
PSYC 366	Methods in Social Cognitive and Affective Neuroscience
PSYC 487	Functional Human Neuroanatomy

Select a minimum of 4 courses (minimum of 12 credit hours) from the Elective Requirements list in the 2024 GA

*MATH 111 *and* MATH 112 may be substituted for MATH 101 *or* MATH 105

PHYS 101 *and* PHYS 103 *or* PHYS 111 may be substituted for PHYS 125

PHYS 102 *and* PHYS 104 *or* PHYS 112 may be substituted for PHYS 126

Students must complete a minimum of three semesters of BIOS 128 (3 credit hours total) to use this course to fulfill an elective requirement

NEUR 310 can be repeated and counted as an elective if a student has chosen NEUR 310 to count as a Project-based Laboratory Course

Neuroscience BA

Neuroscience Minor - Requirements

NEUR 380/PSYC 380

Fundamental Neuroscience Systems

Each student must also complete the requirements for one area of specialization

Area of Specialization: Humanities and Social Science

NEUR 362/PSYC 362

Cognitive Neuroscience: Exploring the Living Brain

Select a minimum of 3 courses (9 credit hours) from the Humanities and Social Science area of specialization list in the 2024 GA

Select at least 1 course (3 credit hours) from the Natural Science and Engineering area of specialization list in the 2024 GA. (*BIOS 385 may be used to fulfill this requirement.*)

Area of Specialization: Natural Sciences and Engineering

BIOS 385

Cellular and Molecular Mechanisms of the Neuron

Select a minimum of 3 courses (9 credit hours) from the Natural Science and Engineering area of specialization list in the 2024 GA

Select at least 1 course (3 credit hours) from the Humanities and Social Science area of specialization list in the 2024 GA. (*NEUR 362/PSYC 362 may be used to fill this requirement.*)

At least 2 of the electives should be completed for the minor only (not shared or double-counted with another major)

PHYSICS AND ASTRONOMY

Students in the Department of Physics and Astronomy will acquire and demonstrate a solid foundation of knowledge in physics and/or astronomy and deeper knowledge of subdivisions of the field related to their interests. They will build the theoretical and laboratory skills necessary to succeed in graduate school or in the workplace and become leaders in their chosen discipline.

Students will develop the ability to identify, formulate and solve challenging scientific and technical problems as encountered in physics and astronomy. They will acquire basic skills in reading the scientific literature and learn how to communicate scientific results orally and in writing with scientists and the general public.

The BA degrees in physics and astronomy provide a broad liberal education with a concentration in physical science, while allowing time to pursue other interests. Graduates typically seek employment in a range of professional fields or in secondary teaching.

The BS degrees in physics and astrophysics are intended to provide intensive pre-professional training. Options for specialized study include applied physics, biological physics and computational physics. Most graduates continue in graduate study or find immediate employment in a technical field.

Degrees Offered

Physics	BA, BS, minor
Astronomy	BA, minor
Astrophysics	BS

PHYSICS AND ASTRONOMY

Guidance on Becoming a Physics and Astronomy Major

- Talk to the PHYS 201 instructor about AP physics credit. It is usually better to take PHYS 111/112 rather than jumping straight into PHYS 201. If you are unsure what to do, speak with the PHYS 201 instructor.
- The BA degree, particularly, can be solid preparation for medical school, law school or teaching, but you will need additional course work specific to those areas.
- A senior research project and thesis are required for the BS degrees. Prior to that, there are summer research experiences available with faculty in the department and at many other universities and national labs. Announcements are distributed to majors via email regularly.
- While computational classes are explicitly required only for the astronomy, astrophysics and computational physics degrees, all areas of physics and astronomy make use of computer programming and numerical analysis. Students should have some exposure to these areas so they can write programs to analyze data and present results as needed for their research projects and classes.
- For the astronomy and astrophysics degrees, ASTR 350 is nearly always taken in the fall of the junior year. The spring courses, ASTR 230 and ASTR 360, can be taken as a sophomore the semester before ASTR 350 or as a junior the semester after ASTR 350. Both semesters of the seminar ASTR 400 should be taken as a senior unless the student plans to be off-campus during one of those semesters.

Physics BA - Requirements

MATH 101 or MATH 105	Single Variable Calculus I or AP/OTH credit in Calculus I
MATH 102 or MATH 106	Single Variable Calculus II or AP/OTH credit in Calculus II
MATH 211	Ordinary Differential Equations and Linear Algebra
or MATH 220	or Honors Ordinary Differential Equations
or MATH 221	or Honors Calculus III
MATH 212	Multivariable Calculus
or MATH 222	or Honors Calculus IV
or MATH 232	or Honors Multivariable Calculus

Select 1 from:

PHYS 101 and PHYS 103	Mechanics (with Lab) and Mechanics Discussion
PHYS 111	Honors Mechanics (with Lab)

Select 1 from:

PHYS 102 and PHYS 104	Electricity and Magnetism (with Lab) and Electricity and Magnetism Discussion
PHYS 112	Honors Electricity and Magnetism (with Lab)

PHYS 201	Waves, Light, and Heat
PHYS 202	Modern Physics
PHYS 231	Elementary Physics Lab
PHYS 311	Introduction to Quantum Physics I

Select 2 courses from:

PHYS 301	Intermediate Mechanics
PHYS 302	Intermediate Electrodynamics
PHYS 312	Introduction to Quantum Physics II
PHYS 355	Introduction to Biological Physics
PHYS 411	Introduction to Nuclear and Particle Physics
PHYS 416	Computational Physics
PHYS 425	Statistical and Thermal Physics
PHYS 480	Introduction to Plasma Physics

Select 6 additional credit hours of PHYS or ASTR courses at the 300-level or above

Select 1 course from:

CMOR 220	Introduction to Engineering Computation
1 course from CMOR course offerings at the 300-level or above	
1 course from MATH course offerings at the 300-level or above

*CHEM 111/112/113/114 may substitute for CHEM 121/122/123/124

Major Concentration in Computational Physics

PHYS 302	Intermediate Electrodynamics
PHYS 312 <i>or</i> PHYS 425	Intro. to Quantum Physics II <i>or</i> Statistical and Thermal Physics
PHYS 416	Computational Physics
CMOR 220	Introduction to Engineering Computation
CMOR 303 <i>or</i> CMOR 302	Matrix Analysis for Data Science <i>or</i> Matrix Analysis
<i>or</i> MATH 354 <i>or</i> MATH 355	<i>or</i> Honors Linear Algebra <i>or</i> Linear Algebra
CMOR 304 <i>or</i> MATH 381	Differential Equations in Science and Engineering <i>or</i> Introduction to Partial Differential Equations
CMOR 422	Numerical Analysis
COMP 140	Computational Thinking

Select 2 courses from:

CMOR 420	Computational Science
CMOR 421	High Performance Computing
CMOR 423	Numerical Methods for Partial Differential Equations
CMOR 435/MATH 435	Dynamical Systems
MECH 454	Computational Fluid Mechanics
PHYS 449	Projects in Data-Enabled Physics
PHYS 580	Introduction to Plasma Physics

Major Concentration in General Physics

PHYS 302	Intermediate Electrodynamics
PHYS 312	Introduction to Quantum Physics II
PHYS 332	Junior Physics Lab II
PHYS 425	Statistical and Thermal Physics

Select 2 courses from:

PHYS 355	Introduction to Biological Physics
PHYS 411	Introduction to Nuclear and Particle Physics
PHYS 412	Solid State Physics
PHYS 413	Introduction to General Relativity
PHYS 416	Computational Physics
PHYS 480	Introduction to Plasma Physics

MATH 381 <i>or</i> CMOR 304	Introduction to Partial Differential Equations <i>or</i> Differential Equations in Science and Engineering
MATH 382 <i>or</i> CMOR 302 <i>or</i> CMOR 303	Computational Complex Analysis <i>or</i> Matrix Analysis <i>or</i> Matrix Analysis for Data Science

Physics BS - General Physics Concentration

SAMPLE DEGREE PLAN

This is **only one** of many possible ways to fulfill your degree requirements.

FALL			SPRING		
FRESHMAN		14 credits	FRESHMAN		16 credits
PHYS 101	Mechanics (with lab)	4	PHYS 102	Electricity & Magnetism (with lab)	4
PHYS 103	Mechanics Discussion	0	PHYS 104	E & M Discussion	0
MATH 101	Single Variable Calculus I	3	MATH 102	Single Variable Calculus II	3
